BEHROOZ KOSHANI

Manassas, VA | (571) 477-3522 | Behrooz.koshani@yahoo.com | linkedin.com/in/behrooz-koshani

CAREER SUMMARY

Security+ and Network+ certified IT and cybersecurity professional with hands-on SOC experience in alert triage, incident investigation, and customer communication. Configured 500+ customer-managed objects and reduced false positives by 75%. Bring network traffic analysis, clear documentation, and a client-first approach to Expel's Associate SOC Analyst role.

AREAS OF EXPERTISE

Security Alert Triage | Incident Investigation and Escalation | Packet-Level Analysis | Customer Communication | Detection Improvement | Investigation Documentation | Windows and Linux | Identity and Access Management | Cross-Team Collaboration

CERTIFICATIONS

- CompTIA Security+ — CompTIA, January 2025
- CompTIA Network+ — CompTIA, June 2025
- Splunk Core Certified User — Splunk, November 2025
- Networking Essentials — Cisco, January 2025

PROFESSIONAL EXPERIENCE

Inova | *Fairfax, VA*
IT Infrastructure Analyst *Mar 2026 – Present*

- Maintain and troubleshoot enterprise Windows environments, resolving hardware, software, and configuration issues to support reliable operations and responsive end-user service.
- Support enterprise identity and access management through Microsoft Entra ID, Exchange, and SharePoint, troubleshooting user access and account issues across business applications.
- Deploy operating systems, applications, and devices using SCCM and MDT to maintain standardized configurations.
- Collaborate with IT teams on upgrades, migrations, and infrastructure improvements; communicate technical issues clearly and coordinate resolution to reduce disruption for users.

DigiCert | *Herndon, VA*
Information Security Engineer, SOC *Jan 2025 – Dec 2025*

- Monitored and triaged SIEM alerts, investigated suspicious security events, assessed urgency and impact, and escalated significant findings according to SLA guidelines.
- Resolved 50+ Zendesk tickets weekly involving high-severity alerts and mitigations; documented investigation findings, response actions, and resolutions to support the alert lifecycle.
- Configured 500+ customer-managed objects and refined monitoring configurations, reducing false positives by 75% by eliminating duplicate traffic counting and improving detection accuracy.
- Analyzed network traffic and recurring alerts to distinguish potential security incidents from monitoring issues, applying packet-level analysis to improve investigation quality.
- Explained security findings and packet-level analysis during 20+ customer calls weekly, adapting technical detail to stakeholders and coordinating mitigation and incident response decisions.
- Supported DDoS investigation and mitigation using Arbor Sightline and NetScout; monitored network performance and availability with SolarWinds and WhatsUp Gold.

Northern Virginia Community College | *Manassas, VA*
Technical & Administrative IT Assistant *2023 – 2024*

- Provided technical troubleshooting, software installation, and account setup support for staff and students.
- Handled 15–20 calls daily, resolving IT inquiries, password resets, and access requests through clear customer communication.

TECHNICAL PROJECT

- LogShield - Built an AI-powered log analysis platform to flag failed logins, suspicious IPs, and anomalies, presenting findings through a security dashboard to support investigation and threat visibility.

EDUCATION & TRAINING

B.A.S. in Cybersecurity, George Mason University
GPA: 3.8 *Expected 2027*
Fairfax, VA
Certificate in Cybersecurity, Year Up / Northern Virginia Community College *Jul 2024 – Jul 2025*
Woodbridge, VA
